Steve Merritt  
Roadbond Service Company  
P.O. Box 5065  
Granbury, TX 76049

Dear Steve:

As you know, The City of Hurst requires all commercial parking lots to be stabilized prior to paving. Roadbond EN 1 soil stabilizer may be used on these projects lieu of lime stabilization.

Please be advised that the installing contractor must be familiar with and follow precisely the installation specifications submitted to the City in October 2003 or any modifications made to those specifications by the manufacturer since that date.

Projects in Hurst completed in the past using your product have shown no problems and thus far, the City is well please with its performance.

Sincerely,

Vince King  
Building Official  
City of Hurst
