Re: EN-1 (Roadbond Liquid Stabilizer) on City of Pharr CDBG Project

Dear Mr. Merritt:

Our laboratory was recently introduced to the EN-1 Roadbond Liquid Stabilizer for the second time by Turner, Collie & Braden Consultants on the above referenced project.

The EN-1 was used with reclaimed salvage caliche, asphalt, and gravel. When mixed in the recommended portions, the material set-up quickly reduced valuable construction time. In-placed moisture density test on the treated material met all minimum requirements for density and moisture content. Attached are copies of these tests for your review.

It is our opinion that EN-1 performed well in its intended usage for the City of Pharr, and that for similar type materials and construction projects. R-KCI would encourage the use of this product.

If you have any questions or comments, please feel free to contact me at (956) 682-5332.

Best regards,

Dennis C. Charkow
CMT Manager
